

US LATE WWII SHIPPING DATA STENCILS

1/35
AR35013W (white)

\$6.95

In order to facilitate pinpoint deliveries of high priority war goods, in 1944 the US instituted a coding system that was used to send goods that supported US forces deployed overseas.

Researched by Henry Closson and Jean Rondia

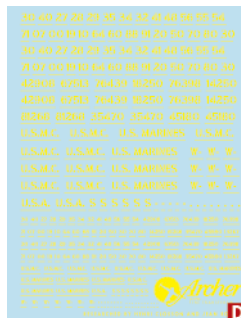

MISCELLANEOUS STENCILED DATA

1/35 AR35014W **\$6.95** | 1/48 AR49021 **\$5.95**

Many times, as vehicles had to produced through ordnance processing checkpoints, data was added to the outside of the vehicle to tell the consumer (receiving unit) what and when a specific process had taken place.
