

Actual sheet measures 2.75 x 4.5 inches (7 cm x 11.4 cm).

RESIN WELD BEADS

Sheet comes with 101.4 linear inches (258 cm) of .030 inch (.76 mm) wide weld beads. These duplicate the "sprue/glue method" popular with model builders today. But, being decals the application process is much quicker. Another advantage these have over our arc weld beads is that they can easily be run around circular details like cupolas.
